IMPACT.

Answers to the most important questions facing a business often lie within its own data. Data science enables businesses to mine that data for drivers of past and future performance, opportunities for new revenue, methods to increase efficiency, ways to improve customer experience and a host of other critical business insights. In short, data science provides an unbiased examination of the past while pointing the way to the future.

From above slide You can see in detail and connect your application to data base by giving you database name, hostname, userid, password

```
import ibm_db
conn=ibm_db.connect("DATABASE=database;HOSTNAME=hostname;
e;PORT=port;PROTOCOL=TCPIP;UID=username;PWD=password",'','')
connState = ibm_db.active(conn)
print(connState)
```

Import above code in your application.

The screenshot shows the Red Hat OpenShift Dedicated web interface. On the left, a sidebar lists various developer tools: Topology, Observe, Search, Builds, Pipelines, Helm, Project, ConfigMaps, Secrets, and Desktop Tools. A blue arrow points from the '+Add' button in the sidebar to the 'new-app' application entry in the main content area. The main content area displays the 'Topology' view for the project 'crt-216301031-dev'. It shows two applications: 'new-app' and 'sa-main-app'. Each application has a 'Service' section with a 'KSVC' icon and a 'REV' icon followed by a unique identifier. The 'new-app' section also includes a 'new' entry. The 'sa-main-app' section includes a 'newap' entry.

The screenshot shows the OpenShift Dedicated developer interface. The left sidebar lists navigation items: +Add, Topology, Observe, Search, Builds, Pipelines, Helm, Project, ConfigMaps, Secrets, and Desktop Tools. The main content area displays the "Getting started resources" section, which includes links to "Create applications using samples" (Basic Quarkus, Basic Spring Boot), "Build with guided documentation" (Get started with Quarkus using s2i, Get started with Spring), and "View all quick starts". Below this, there are four large cards: "Developer Catalog" (All services, Database, Operator Backed), "Git Repository" (Import from Git), "Container images" (Deploy an existing Image from an Image registry or Image stream tag), and "From Local Machine" (Import YAML). The top bar shows the project "crt-216301031-dev".
